High Speed Cable Internet Setup Guide

Thank You for choosing Acanac

In order to ensure the smooth setup of your Acanac High Speed Cable Internet service, please follow the easy steps laid out in this guide.

The setup kit for your High Speed Cable service should contain the following items:

*Please note that the modem shown is for the purposes of illustrating the setup process and may differ from your device.

Before beginning the setup process, please ensure that all of your equipment is turned off.

STEP 2

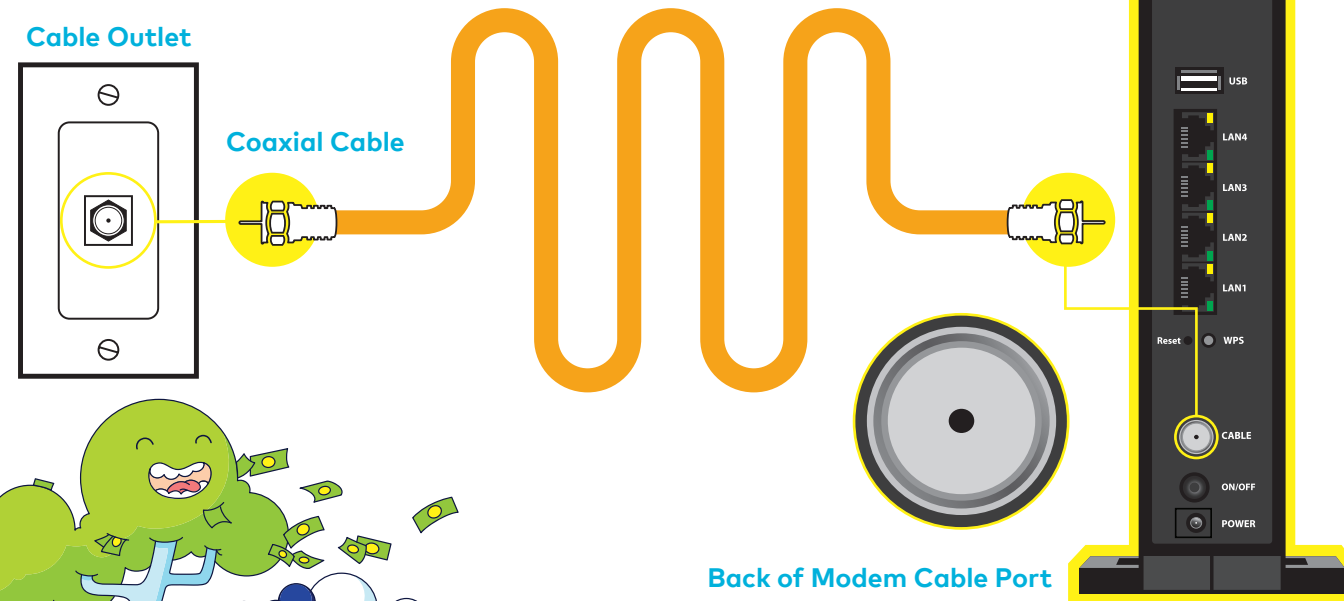

Using the Ethernet cable provided in the setup kit, connect your computer or laptop to an available LAN port at the back of the modem.

You may now connect the appropriate power adapters to the devices, starting by the Cable modem.

STEP 1

Connect the coaxial cable emerging from your cable outlet to the CABLE port located on the back of the modem.

Coaxial cable should be supplied during installation. If you require a longer length of coaxial cable, this can be purchased at most home electronic stores.

STEP 3

Please wait 2 minutes for the modem to boot-up. If the setup was successful, the modem will present the following light status:

Front of Modem

Cable Modem Lights

LIGHTS	READ
Power	Solid white
DS	Solid Blue
US	Solid Blue
Online	Solid white
2.4 GHz	Solid white when operational
5 GHz	Solid white when operational
WPS	Off when not actively connecting

CONGRATULATIONS! YOUR SETUP IS NOW COMPLETE.
